

Training and support

Initial training & facilitation session

We provide a **training & facilitation session at your practice**, to help your team get the most out of your DRINFO monthly audits. The training session is **1 hour 30 minutes** and we recommend it is attended by the **Practice Manager, Nurses and key Doctors**. We will liaise with you to find a mutually convenient date and time. Evening or weekend training can be arranged upon request. We suggest this training & facilitation session occurs within the **first six months**.

To organise your in-practice training session for your practice team (1 hour 30 mins), please complete the training & facilitation request form

Advanced training and user group meetings

We are happy to run regional advanced training sessions throughout the year. Please contact us to find out more or request one of these in your area.
